Package: controller

Object
controller:: <b>Control</b>
Constructors
+ Control() : void
Methods
+ addGame( String, double, String, String, String, String, String, String, String, String[] ) : boolean + addOrder( Vector<Game>, int ) : boolean + addOrderLines( Vector<Game>, int ) : boolean + addUser( String, String, String, String, String, String, String, String, String ) : int + averageRating() : HashMap<Integer, Double> + cosineCorrelation( HashMap<Integer, Double>, int ) : HashMap<Integer, Double> + createGenreGameVector( String ) : Vector<Game> + createHistoryVector( int ) : Vector<Order> + createOrderList( int ) : Vector<Game> + createOrders() : HashMap<Integer, Vector<Order>> + createVectorGames( ResultSet ) : Vector<Game> + deleteOrder( int ) : boolean + deleteUser( String[] ) : boolean + expectedRating( Vector<Integer>, HashMap<Integer, Double>, int, HashMap<Integer, Double> ) : HashMap<Integer, Double> + fiveNeighbors( HashMap<Integer, Double> ) : Vector<Integer> + fromRsToGame( ResultSet ) : Game + getClientUsers() : ArrayList<User> + getGame( int ) : Game + getRatingTable() : HashMap<Integer, HashMap<Integer, Double>> + getRelevantGames() : Vector<Game> + getUser( String ) : User + isAdmin( String ) : boolean + isExist( String ) : boolean + mostRecomdeddGames( HashMap<Integer, Double>, HashMap<Integer, Double>, int ) : Vector<Integer> + passwordMatch( String, String ) : boolean + rateGame( int, int, double ) : boolean + recommendedAlgo( int ) : Vector<Integer> + search( String ) : Vector<Game> + unrelevantGame( String[] ) : boolean + updateField( int, String, String, String, String, String, String, String, String ) : int + updateGame( int, String, double, String, String, String, String, String, String, String[] ) : boolean + userGames( int ) : Vector<Game>

Package: database

Object
database:: <b>DatabaseFoundations</b>
Constructors
+ DatabaseFoundations() : void
Methods
+ createGamesDb( Connection ) : void + createGenreDb( Connection ) : void + createOrderLinesDb( Connection ) : void + createOrdersDb( Connection ) : void + createRatingDb( Connection ) : void + createTableGames( Connection ) : void + createTableGenre( Connection ) : void + createTableOrderLines( Connection ) : void + createTableOrders( Connection ) : void + createTableRating( Connection ) : void + createTableUsers( Connection ) : void + createUsersDb( Connection ) : void + main( String[] ) : void

Object
database:: <b>Database</b>
Properties
- conn : Connection - statement : Statement - pStatement : PreparedStatement
Methods
+ isUserExist( String ) + addUser( String, String, String, String, String, String, String, String ) + updateField( int, String, String, String, String, String, String, String ) + addGameToGenre( String[], int ) : boolean + userGames(int) + getGame(int) + getRelevantGame() + getUser(String) + getSummary() : String + updateGame(int, double, String, String, String, String, String, String, String, String[]) : boolean + addGame(double, String, String, String, String, String, String, String, String[]) : boolean + addGameToGenre(String[], int) : boolean + getClients() : ResultSet + deleteUser(String) : boolean + deleteOrderByClientId(int) : void + unrelevantGame(int) : boolean + deleteGameFromGenre(int) : boolean + getGamesByGenre(String) : ResultSet + getGamesById(ResultSet) : ResultSet + getClientOrders(int) : ResulSet + getOrderLines(int) : ResultSet + addOrder(int) : ResultSet + deleteOrder(int) : boolean + addOrderLines(int, int) : boolean + deleteOrderLines(int, int) : boolean + deleteOrderLines(int) : boolean + gettLastNumOrder() : ResulSet + lockTables() : void + unlockTables() : void + addRatingRowsForNewUser(int) : boolean + addRating(int, int, double) : boolean + gameId(double, String, String, String, String, String, String, String) : int + deleteGame(int) : ResultSet + deleteRating(int, int) : boolean + deleteRatingByClientId(int) : boolean + updateRating(int, int, double) : boolean + getUserRating(int) : ResultSet
